

SERIES ANP2 | ANTENNE

NOMENCLATURE

FEATURES

	ANP21-xNSE
Operating band	430 - 450 MHz
Impedence	50 Ω
Gain	+2 dBi
V.S.W.R.	< 2 : 1
Radiation	Omnidirectional
Max power allowed	10 W
Operating temperature	-40°C +80°C
Material	Thermoplastic polymer
Length	145 mm
Diameter	18 mm
Weight	22 gr

NOTE

To reach the indicated performance the antenna need a proper ground plane.
For a correct installation, please mount the antenna a least 5 cm distant from every metallic object and perpendicular and in the middle of its ground plane.
